

Optical filters

Optical Filters Ltd a recognized leader in display enhancement and emi-shielded windows are pleased to announce the opening of **Optical Filters USA LLC** and Phase 1 of the manufacturing facility in Meadville, PA.

This advancement will serve our customers' growing demand for shorter delivery times and promote a strategic position in the North American market.

The **Optical Filters USA LLC** facility consists of 6000 sq.ft of manufacturing sited on approximately 5 acres with outline planning for an additional 30,000 sq.ft of manufacturing space.

Phase One:

- Fabrication of EmiClare emi-shielding windows from September 2004. A zero-compromise solution to the emi-shielding of electronic displays using the unique EmiClare mesh that is optimized for total optical and emi-shielding performance.
- Fast turnaround from order to delivery on the EmiClare Sigma range.
- Investment in the latest equipment and a skilled workforce to support our focus on quality including State of the art CNC machinery and computerized measuring and inspection systems.

The development of the Meadville site will involve close co-operation of **Optical Filters Ltd** in the UK. Phase Two of the development will offer a full capability in the production and delivery of laminated glass and plastic emi shielding and display enhancement windows.

The combined resources of **Optical Filters Ltd** and **Optical Filters USA LLC** offers a unparalleled ability to provide in-depth product development, technical solutions, manufacturing capability and customer service in Europe and North America.
